## PROGRAMME OUTCOMES, PROGRAMME SPECIFIC OUTCOMES, COURSE OUTCOMES

Mechanism of Communication: The College adapts Outcome based education rather than input oriented bell shaped curve of learning. The following mechanism is followed by the institution to communicate the learning outcomes to the teachers and students.

Graduate attributes are described to the first year students at the commencement of the programme. Learning Outcomes of the Programs and Courses are observed and measured periodically.

Soft Copy of Curriculum and Learning Outcomes of Programmes and Courses are uploaded on the Institution website for reference.

The importance of the learning outcomes has been communicated to the teachers in every IQAC Meeting and Staff Meeting.

By emphasizing application of the knowledge and competencies acquired through a program of study and the integration of knowledge and competencies in other areas of their lives, students become more involved in their learning and in the various types of content.

The emphasis on integrating transferrable knowledge and competencies helps students make the link between courses, course evaluations and other types of knowledge, which encourages engagement. Lastly, students gain a better understanding of the conditions for evaluation and objectives of each course.
